## HESSELBEIN REACTS TO NEW SURPLUS PROJECTIONS

MADISON – The Legislative Fiscal Bureau (LFB) announced today that the Wisconsin will finish the current fiscal year with a \$7.1 billion surplus - \$524 million more than earlier projections. State Senator Dianne Hesselbein (D – Middleton) released the following statement:

“Thanks to Governor Evers’ leadership, our state now finds itself in a stronger financial position than anyone could have predicted. These new projections make it clear we can answer the governor’s calls for improvements in public safety, middle class tax relief, and investments in our public schools. They also show cause for caution in the years ahead. This is a time for effective investments, not reckless tax schemes that bust future budgets.”
